

Pavement Sealers

Available in bulk tanker up to 5,000 gallons and 55 gallon drums

Poly-Tar® - High performance coal tar emulsion sealer

- Longest life of any seal coating product
- Polymerized for maximum resistance to wear, improved fuel resistance, & stronger adhesion
- Ideal for high traffic parking lots and driveways, airport ramps, aprons & taxiways
- No additional modifiers or latex additives required

Fed Spec/Fed Spec HS

Premium coal tar emulsion sealer concentrate for commercial applications

- Excellent durability that dries to a rich, jet black finish for extended service life
- Protects asphalt from destructive elements such as oil & gas
- Meets or exceeds requirements for Fed. Spec. R-P-355e, ASTM D 5727, & FAA P-625, P-627, P-630 and P-631

Guardian PM

High performance, polymer-modified, asphalt emulsion sealer

- Polymerized during manufacturing process for maximum performance
- Low VOC water-based asphalt coating
- No additional modifiers or additives required

Guardian AE

Asphalt emulsion sealer concentrate for commercial applications

- Highly durable protective coating, proprietary resin base
- Polymeric formula enhances adhesion, durability & rich black appearance

Pro-Blend

Polymerized blend of coal tar and asphalt emulsion sealer concentrate for commercial applications

- Highly durable protective coating and low odor formula
- Maintains a rich black appearance
- Polymeric formula enhances adhesion and durability
- Proprietary resin base for added strength

Sand Mix AE

Preblended, high performance, and fortified with polymers asphalt emulsion sealer

- Low VOC pavement sealer
- Excellent wear protection with a rich black color

Sand Mix

Fed Spec concentrate sealer with pre-blended additives and sand

- Weatherproofs & seals porous asphalt that protects from oxidation
- No sand or polymers required

Additives for Pavement Sealers

Available 5 gallon pails and 55 gallon drums

Ultra 3 Latex

- Resists high pavement temperatures and improves strength
- Increases viscosity, improves adhesion and reduces power steering marks

AQS 3 Latex

- Reduces power steering marks and improves sealer adhesion
- Sealer dries blacker with improved strength, durability and drying time

GuardFlex

- Promotes greater adhesion, sand suspension, and locks sand in for extended wear
- Reduces power steering marks

Boost Pro

- Increases viscosity in refined tar sealers for better sand loading
- Better adhesion while reducing power steering marks and scuffing

Rapid Set

- Used to decrease dry time; superior performance modifier for coal tar & asphalt based sealers
- Reduces power steering marks and improves sealer adhesion

Tarmax R-100

- Concentrated viscosity modifier for improvement of sealer adhesion
- Meets FAA P625-P627

Diamond Shield

- Reduces drying time, tire marks, and sand rollout

Primers

Available in 5 gallon pails, 55 gallon and bulk

TarPrime

- Used for priming difficult-to-seal pavement surfaces such as oil spots, weathered asphalt and polished aggregates

Tarloc MPC

- Multi-purpose primer for use on badly oxidized pavements and polished aggregates

Tack Coat

- Asphalt emulsion tack coat for improved adhesion for patching & overlays

Traffic Marking Paints

Available in 5 gallon pails

Acrylic Latex Traffic Marking Paint

- Fast drying durable latex paint designed for freshly seal-coated surfaces or new asphalt
- Meets Federal specification TTP 1952B

Fast Dry Acrylic Latex Traffic Paint

- 5 minute rapid drying acrylic latex paint designed for freshly seal-coated surfaces, new asphalt and restriping
- Added resin for durability and wear
- Meets Federal specification TTP 1952D, Type 1

Acetone Acrylic Traffic Paint

- Solvent based, low VOC, heavy-duty marking paint for higher performance
- More versatile temperature variances that can be installed on freshly sealcoat parking lots
- Meets Federal specification AA 2886 Type II

Crack Filling Materials

Trowelable Crack Filler

- Thick mastic compound for depressions in asphalt surfaces
- Used to fill cracks up to 1" wide

Cold Pour Crack Fillers

- Pourable Crack Filler
- Super Flex

Hot Pour Crack Fillers

- GemSeal Crack-Flex® Pro
- GemSeal Crack-Flex® Pro-S
- Dura-Fill HS and HS2
- Dura-Fill PL and LP
- Right Pointe 3405 and 3405 PLS
- W.R. Meadows Hi-Spec
- W.R. Meadows 164
- W.R. Meadows 3405

Patching & Miscellaneous

SAKRETE® US Cold Patch

- Revolutionary product that out performs conventional cold patch
- Sets faster and eliminates rework to save you money

SAKRETE® Blacktop Patch

Black and Industrial Sands

Hand Tools

Professional quality brooms, brushes, tampers, rakes, shovels & squeegees for prep work & sealer application

Measuring & Marking Tools

A variety of measuring wheels, layout tape, marking chalk, spray can holders, etc

Equipment & Ancillary Items

A variety of spray tips, blowers, strippers, stencils, signs, safety apparel, traffic cones, gloves, and speed bumps

gemsealproducts.com

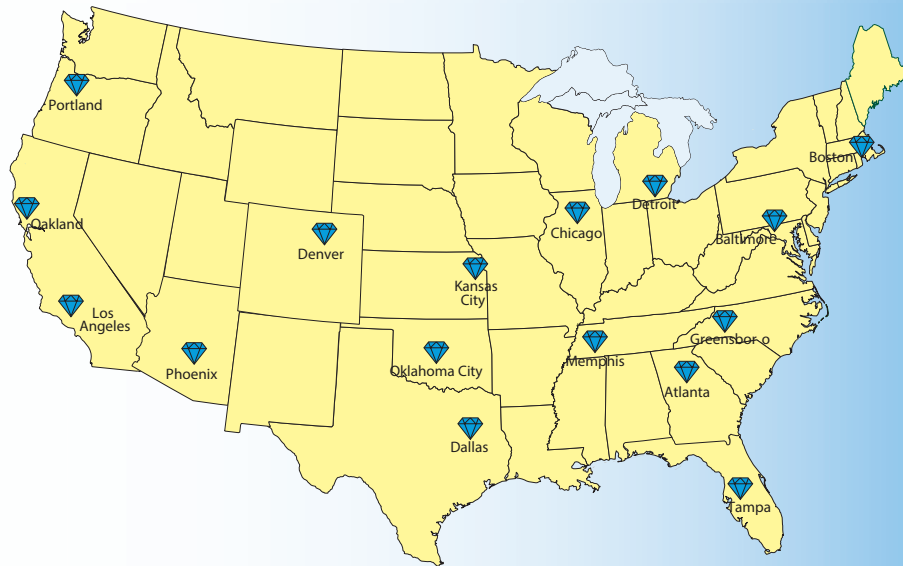

Why GemSeal...

A Name You Can Trust

For nearly 60 years the GemSeal team has been passionate about pavement products. With a wide network of manufacturing plants, we can meet customer needs quickly and cost-effectively on a national, regional, and local basis.

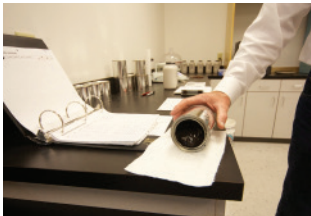

- Complete line of products
- Superior technical knowledge
- Quality service - second to none

Precision Colloid Manufacturing

Unlike batch production methods, our colloid mill manufacturing process ensures that every load of sealer will be consistent and provide:

- More uniform appearance of your properties
- Less down time
- Reduced call backs
- Fewer on-site issues

We Stand By Our Quality

Respected for high business ethics and service, GemSeal is a leading and dependable manufacturer of quality sealers and services.

- Guaranteed uniformity between batches
- Quality control testing conducted at every production facility
